

# TICKS IN THE SUBURBS

Which is more likely to be a tick habitat?

VS

**Both!** Ticks like damp, shady areas where animals like to hide.

Which tick is found in Massachusetts and can transmit disease?

VS

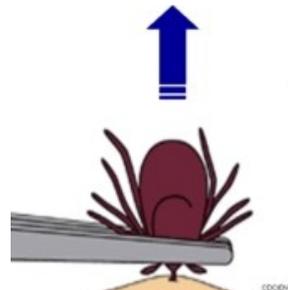

**Both!** The left shows a dog tick, and the right shows a deer tick. They are both found in MA and carry different diseases.

Which way do you safely remove a tick?

VS

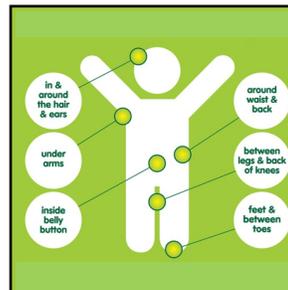

**The right is right!** Always use tweezers to remove a tick. Never try to use home remedies such as Vaseline or matches.

How can you prevent diseases from ticks?

VS

**Both!** Using DEET when outdoors will repel ticks. Doing a full body check every day will help to find a tick before it can bite long enough to transmit disease.
