Subject:

Planning Board – Special Permit & Site Plan Approval

20 Ledin Avenue, Avon, Massachusetts

CEC Project 311-399

Dear Mr. Comeau:

As part of the Town of Avon Application for Site Plan Approval and Application for Special Permit Approval, Civil & Environmental Consultants, Inc. (CEC) presents this summary of proposed work at 20 Ledin Avenue on behalf of Waste Management of Massachusetts, Inc.

The Special Permit and Site Plan Approval application includes the following information:

- One (1) original and seven (7) copies of Site Plans.
- One (1) original and seven (7) copies of the Stormwater Report.
- One (1) original and seven (7) copies of the application.
- One (1) certified abutters list.
- One (1) special permits district fee of \$250.00 (check no. 1071).
- One (1) Site Plan review fee of \$750.00 (check no. 1070).

## 1.0 NARRATIVE

The Site is identified as parcel B6-1-16, and contains approximately 2.3-acres of area. Per the Assessor's Database, the Site currently contains an existing 25,220 square foot (sf) industrial building. The Site also contains existing parking, loading and landscape areas. The current Owner (Thomas Morrissey from Boston Brace International) has provided a letter of authorization allowing the Applicant to submit this and future permit applications to the Town for consideration. A copy of this letter is attached for reference.

The rear of the property will be modified from a current undeveloped area to a paved lot with three catch basins, including one water quality unit, three drainage manholes, and an infiltration chamber with a retaining wall along the east and south of the property. The stormwater system in the rear of the property is designed to capture rainfall on the rear of the property, as well as from the property to the west, 40 Ledin Avenue, that flows onto the property, and to prevent stormwater from draining to the adjacent property to the east, 10 Ledin Avenue. The proposed stormwater system will better capture stormwater when compared to the existing system, and will provide water quality measures and an infiltration system.

In addition, an existing stormwater catch basin located adjacently east of the building, as well as the roof drain leading to the catch basin, and the drainage culvert draining away from the catch basin, will be replaced.

The expansion will include a canopy and siding on the east wall to minimize debris from being blown from the facility. The south facing wall will remain open for vehicle ingress and egress to and from the facility. The proposed roof expansion does not increase the existing floor area of the building or impervious area on the site, and would have no impact on existing utilities, landscape features, walkways, parking or site drainage. Internal vehicular and pedestrian circulation would be minimally impacted as the expansion simply partially encloses existing site operations.

The project promotes the health, safety, and general welfare of the community by better managing stormwater runoff and overall improving the management of the site, without any negative impacts to the groundwater table or surface waters.

## 4. Site Plan Submission Requirements

(Provide one (1) Original and seven (7) copies of all Plans, Narratives, and Applications)

- A. Completed Site Plan Application (this form);
- B. Plan(s) at a scale 1'' = 20' or 1'' = 40' for large plots
- C. (unless waived by the Planning Board drawn by a registered land surveyor or professional engineer including the following information (show on multiple sheets for ease of reading):
  - > Access and egress to and from the site;
  - > Lot lines and easements, if any;
  - > Current and proposed building(s) and structure(s) as proposed on the site, or if not, provide the plan of adjacent properties;
  - > Topography with the appropriate contours of the site and adjacent sites;
  - A professionally developed plan identifying surface water bodies, flood plain area(s) and area(s) subject to the 100-year flood elevation. The determination of the items and/or area(s) to be included shall be made by the Planning Board and when appropriate the Conservation Commission:
  - > Landscape features, walls, walks, and lighting;
  - ➤ Landscaping proposed as determined appropriate and consistent with any screening and/or green space;
  - > Location of parking areas and facilities for internal vehicular and pedestrian circulation;
  - > Site drainage and supporting data, if required;
