Avon, MA 02322

**Re: 225 Bodwell St – Rooftop Solar Installation Project
Special Permit Application – Water Supply Protection District**

Dear Mr. Comeau and Members of the Board:

NextGrid, Inc., presents the Rooftop Solar Installation Project proposed at 225 Bodwell St in Avon, MA. The applicant is submitting this project for Special Permit, under the Town of Avon Zoning By-laws, section 255-5.4 Water Supply Protection District

Existing Site Summary: The current property at 225 Bodwell St falls within the Industrial District and totals approximately 3.99 acres (173,790 sf). The site is comprised of one (1) steel building steel totaling approximately 76,000 sf. In addition, the site has an existing bituminous concrete parking lot, with a total of 45 spaces. All existing and proposed structures are within the Industrial District. There are bordering vegetated wetlands located along the southern edge of the property, and there are no estimated habitats of rare wildlife. Finally, the entire of the site falls within the Town of Avon’s Water Supply Protection District.

Project Summary: The proposed project includes the installation of a rooftop only solar array, with accessory structures for the equipment associated with the array, including a stationary battery storage system along the northern property line. The project proposes a total of 1,566 panels. In addition, the applicant proposes a new electrical service, including a concrete equipment pad with utility enclosures. There is no new impervious area, outside of two small equipment pads, which total less than 150 sf.

The proposed area encompassing the solar panels be leased to NextGrid by the property Owner and after the useful life (20-25 years) will be disassembled and removed by the NextGrid.

Compliance with Town of Avon Performance Standards: The proposed project has been designed to comply with Section 255-5.4, subsection E(4) Standards, and will not result in the following:

1. A one-percent or greater reduction in the groundwater yield of the public wells in the district;
 - a. ***The project, as proposed will result in not increase in groundwater yield of the public wells in the district, as the solar panels or equipment require no connection to any public water supply.***
2. Pollution from sewerage wastes, stormwater runoff or other liquid or water-soluble materials that would reduce the affected aquifers or streams to below drinking water standards or otherwise reduce the quality of water available in the public wells in the district or in downtown surface water supplies;
 - a. ***The project will result in no pollution from sewer wastes, stormwater runoff or other liquid or water-soluble materials as the solar panels produce no waste and are inert materials. In addition, there will be no impact to stormwater as they panels are located on previously impervious areas (i.e. roof).***
3. Violation of underground injection control regulations under 310 CMR 27.
 - a. ***The project will result in no violation of underground injection control regulations under 310 CMR 27, as the project requires no underground injection of any materials.***

It is anticipated that the project will take approximately 2-months for installation, once permits are finalized. The applicant anticipates starting construction as soon as possible, following project approval.

If we can be of any further assistance regarding this matter, please contact us at our office.

Very truly yours,

NextGrid Inc.

Nathan A. Collins, P.E.

Senior Manager of Engineering

4. Site Plan Submission Requirements

(Provide one (1) Original and seven (7) copies of all Plans, Narratives, and Applications)

- A. Completed Site Plan Application (this form);
- B. Plan(s) at a scale 1" = 20' or 1" = 40' for large plots
- C. (unless waived by the Planning Board – drawn by a registered land surveyor or professional engineer including the following information (show on multiple sheets for ease of reading):
 - Access and egress to and from the site;
 - Lot lines and easements, if any;
 - Current and proposed building(s) and structure(s) as proposed on the site, or if not, provide the plan of adjacent properties;
 - Topography with the appropriate contours of the site and adjacent sites;
 - A professionally developed plan identifying surface water bodies, flood plain areas(s) and area(s) subject to the 100-year flood elevation. The determination of the items and/or area(s) to be included shall be made by the Planning Board and when appropriate the Conservation Commission;
 - Landscape features, walls, walks, and lighting;
 - Landscaping proposed as determined appropriate and consistent with any screening and/or green space;
 - Location of parking areas and facilities for internal vehicular and pedestrian circulation;
 - Site drainage and supporting data, if required;
 - Any loading facilities as may be required;
 - Traffic study, if required by the PGA, given the proposed development of the site and the expected traffic impact;
 - Architectural drawing of the proposed building(s) and structure(s), if required by the PGA

5. Authorization (Must be Signed by the Owner of the Property)

I am the record owner of this property for which this application is being filed and as such, I am familiar with the work proposed to be carried out on my property.

I hereby give permission for this application to be filed with the full understanding that certain restrictions may be placed on the property relative to the approval of the proposed work.

I further certify that under the penalties of perjury, I am to sign this application.
